

Public, Workplace,
& Retail EV Charging
Solutions

EV charging is no longer an amenity, it's a necessity

As more drivers go electric, businesses are adapting. Get ahead of the curve: attract and retain high-value customers now to make sure your business stands out from the competition.

SWTCH's end-to-end charging solution provides a seamless charging experience for EV owners and optimizes usage and revenue for business and property owners.

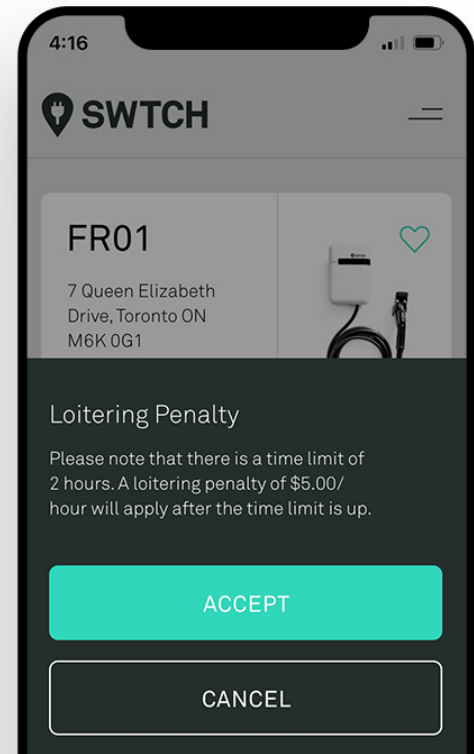

Designed with your property and visitors in mind

SWTCH's access management ensures that your tenants, employees and customers get the appropriate access to each charger, and you get to maximize the value and revenue from the investment.

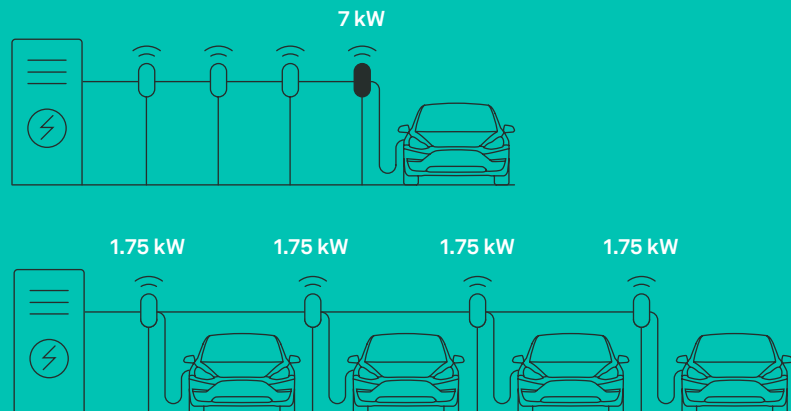

Our customizable solution provides you with full control over how chargers are used, and can include:

- Loitering fees
- Time-of-use or tiered pricing
- Commercial chargers that are available to the public after business hours

No capacity? No problem.

SWTCH's smart load-management helps overcome the challenge of limited electrical capacity to keep infrastructure upgrade costs low.

EV chargers to meet your property's needs

We offer a wide range of OCPP-compliant EV chargers to ensure you have the flexibility to choose hardware that fits for your property, customers and budget. Be it Level 2, DC Fast, or a mix of both — our versatile software ensures you have the right solution from day one.

Level 2 Chargers

Level 2 chargers are perfect for your employees or commercial clients who will be on the premises for several hours, long enough to get a significant charge.

DC Fast Chargers

With charging speeds 2-10 times faster, DC fast chargers are the ideal solution for drivers who will be parked for less than two hours.

**Installation?
We've got it
covered.**

SWTCH provides installation, operations and maintenance support across the United States and Canada.

**Have your own
contractor?
Not a problem.**

We can work directly with your existing contractor to provide the hardware and training for a smooth installation.

SWTCH works hard so you don't have to

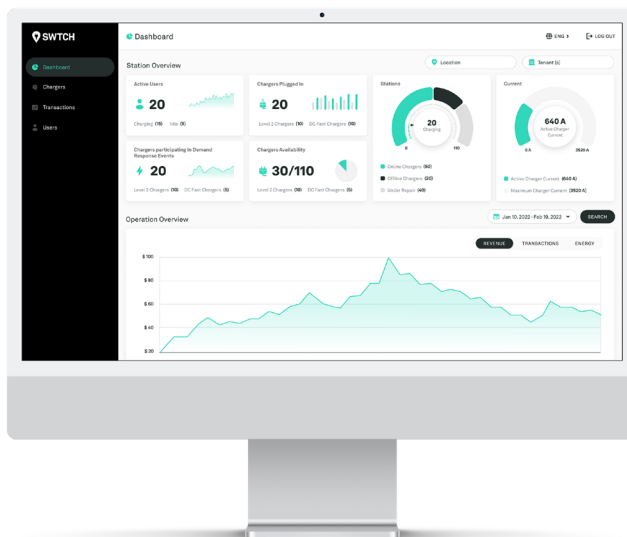

Let us take care of your EV chargers so you can take care of your property. Our comprehensive solution includes smart building integrations, flexible rates, smart scheduling, alerts, dashboards (see below) and our 24/7, 365-day-a-year support, offering:

Technical Support

Our system finds problems before drivers do, notifying us directly, enabling us to proactively solve the problem.

Customer Support

Our technicians are always available by phone and email to help drivers with any problems they may encounter.

Easy to charge

With our intuitive mobile app, complimentary RFID charge cards and the ability to charge without an account, we ensure drivers get the charge they need — effortlessly.

We know EV charging inside and out

We've done it all: from grocery stores and malls to commercial towers and government buildings, we have tailored our EV charging solutions to each project's unique needs.

Connect with us.

Let's get started with a complimentary consultation. We'll walk you through the ins and outs of EV charging and ensure you get the right system for your property.
